STEEL FABRICATION

As specialists in sheet metal fabrication, Creation Engineering offers a comprehensive range of services to meet your fabrication needs. Our capabilities include metal punching, precision sheet metal profiling, laser cutting, sheet metal folding, as well as MIG and TIG welding.

ENGINEERING ANALYSIS

Creation Engineering offers comprehensive engineering analysis services, utilizing advanced computational tools and techniques to perform in-depth simulations, modeling, and testing

ENGINEERING CONSULTANCY

A woman with dark hair and glasses, wearing a light blue shirt, is pointing with a white marker at a whiteboard. The whiteboard has some green handwritten notes and a small diagram. A man with short blonde hair, wearing a blue shirt and a black lanyard, is standing next to her, looking at the whiteboard. The background is a blurred office environment with glass partitions.

As a leading engineering consultancy firm, Creation Engineering offers expert advice and solutions to clients, leveraging our deep industry knowledge and technical expertise to address complex engineering challenges

ADDITIVE MANUFACTURING

We fabricate complex and customized components, leveraging layer-by-layer material deposition, enabling rapid prototyping, cost-effective production, and design optimization, pushing the boundaries of manufacturing possibilities

ENGINEERING DRAWING

At Creation Engineering, our engineering drawing services provide meticulous and comprehensive technical drawings and documentation, enabling seamless communication and precision in design specifications for a wide range of projects

CARBON FIBRE FABRICATION

A close-up, low-angle shot of the front of a dark-colored car. The focus is on the front grille, which has a prominent hexagonal mesh pattern. To the left, a multi-spoke alloy wheel is visible. The car's body panels are highly reflective, showing highlights from the environment. The overall lighting is dramatic, with strong highlights and deep shadows.

Creation Engineering specialise in the production of cutting-edge carbon fibre components, utilizing premium carbon fibre fabric and resins in our manufacturing process.
